1981 CENSUS

Programme of Census Reports

1. Preliminary Report

This report was published in July 1982 and contained provisional figures of the population and private households for each of the 26 local government districts with a brief statistical commentary.

2. Report for Belfast Local Government District

This report was published in December 1982 and related to the Local Government District of Belfast. The tables contained information to Ward level. Subjects covered in this report included age distribution, sex, marital status, birthplace, religion, households, tenure, amenities, occupation density, availability of cars, communal establishments, economically active population and employment status.

3. Summary

This report was published in February 1983 and contained information for Northern Ireland and for each of the 26 local government districts. The subjects covered included age distribution, sex, marital status, birthplace, religion, households, tenure, amenities, occupation density, availability of cars, communal establishments, economically active population and employment status.

4. Housing and Household Composition

This report was published in August 1983 and gave detailed information on households, tenure, occupation density, car availability, sex, age, marital status and related household composition to social and other economic characteristics.

5. Economic Activity

This report was published in October 1983 and gave figures for the both economically active and inactive population. The employed population was analysed by industry and occupation classifications and related to age, marital status, employment status, socio-economic groupings, area of workplace, etc. Most tables contained information at Northern Ireland level but certain ones gave details for local government districts.

6. Workplace and Transport to Work

Employed population details in relation to area of workplace/residence are contained in this report. Workplace movement by socio-economic group, occupation, industry, means of transport and times of journey is also detailed to local government district level.

7. Migration

Numbers and characteristics of the population who changed their usual address in the year before Census day will be contained in this report. Migrant households will be detailed by age, sex, marital status, etc. Some tables will refer to Northern Ireland and others will be detailed to local government districts.

8. Education

This report will give details of age, sex, occupation and industry of the population who have obtained higher educational qualifications analysed to Northern Ireland level.

9. Religion

Tables in this report will give, by the main religious denominations, details of the population by sex, age, marital status, occupation, industry and other characteristics.

Explanatory Notes and Definitions of Terms used in the Report

Introduction

Information in this report relates to the economic activity of persons aged 16 years and over in the week ended 4 April 1981. The tables are based solely on the enumerated population. They do not contain any information on the non-enumerated population, which, based on information from the census and other sources is now estimated at 74,000. However, this estimate as with all estimates, is subject to revision in the light of other information. The tables contain information on the employed population by area of residence and workplace in relation to socio-economic groups, occupation, industry, transport etc.

Administrative Divisions

The local government districts for which statistics are presented in this report are those in existence at the date of the census.

Population

Census results are presented as cross tabulations, each counting a particular population, for example, people, households, families or people in communal establishments. It is important to know exactly what is being counted, i.e. the population base. Information on whereabouts and usual address given for each person listed on the Census form can be used to derive the population base.

The **population present on census night (present population)** in an area is the count of all people recorded as spending census night in the area regardless of whether or not this was where they usually lived; that is, all persons recorded on the Census H Forms for whom the whereabouts on census night was given as the relevant household, plus all persons recorded as being in communal establishments.

The **usually resident population** in an area is the count of those people recorded on the forms for the area as usually living 'at this address' whether or not they are present on census night.

Shipping: Apart from houseboats (enumerated as private households), vessels were treated in a similar way to communal establishments with a listing form and individual return forms for each person on the ship. Persons on naval vessels in Northern Ireland waters or ports on census night were included as present in the home base port of the ship. Generally persons on other vessels were counted as present in the area in which the form was collected. For shipping moving between a port in Northern Ireland and a port in England, Wales, Scotland, Isle of Man or Channel Isles arrangements were made for the return of forms to the issuing country and persons in such vessels were counted as present in the area of issue.

Campers, Vagrants, Persons sleeping rough, etc.

The present population also includes persons not enumerated in private households or communal establishments, for example, vagrants, persons sleeping rough and persons enumerated in caravans or other non-permanent structures which were not the usual residence of any persons present on census night.

Population covered in this Report

Figures contained in this report refer to the population aged 16 years and over who were usually resident in and employed at a workplace in Northern Ireland. Persons working in Northern Ireland but resident elsewhere and persons resident in Northern Ireland but working elsewhere are excluded from this report.

Households

A household is either one person living alone or a group of persons (who may or may not be related) living at the same address with common housekeeping. Persons staying temporarily with the household are included. A group of people are treated as a household if there is any regular arrangement to share at least one meal a day. Two people who share one room, although each may have separate catering arrangements, are treated as one household. A household must have exclusive use of at least one room.

Age

Age is the completed years of age at census date as derived from the date of birth question.

Usual Address

In most cases the answer to the usual address question is straightforward. However, students and children away from home during term-time were to regard their home address as their usual address. Boarders were to decide whether they considered as their usual address, the address of the relevant household. Household heads living away from home for part of the week were to regard their home address as their usual address.

Persons who failed to answer the relevant questions appear as part of the usually resident population in the area in which they were enumerated and are included as part of a usually resident private household.

Visitors

Visitors are those present at the relevant household address on census night whose usual address is elsewhere.

Place of Work

Persons in employment were asked to state either (i) the address of workplace or (ii) no fixed place or (iii) mainly at home. Those not working regularly at one place or who travel during work were asked to give the address of the depot or office to which they report daily. Persons on site work for a long period were asked to give the address of the site.

Economic Activity

The economic activity tables describe the economic characteristics of the population. The characteristics include both those obtained directly from census questions – economic position, employment status, occupation, industry and workplace – and others derived from combining answers to these questions – social class and socio-economic group (from employment status and occupation) and socio-economic class (from social class and socio-economic group).

Only specified groups were required to answer such of the economic activity questions and this is reflected in the population to which tables refer. Thus:

- (a) Tables relating to economic position include only persons aged 16 years and over.
- (b) Tables relating to social class or socio-economic group or socio-economic class cover the economically active, retired from employment and permanently sick.
- (c) Tables relating to occupation cover the economically active.
- (d) Tables relating to employment status, industry and workplace cover persons in employment.

Economic Position

The Classification by Economic Position is as follows:

Economically Inactive

Retired means wholly retired from employment and no longer seeking paid work. Married women engaged on unpaid home duties are not regarded as retired but classed as other persons economically inactive.

Students are persons in full time attendance at an educational establishment irrespective of whether or not they have part-time or seasonal employment.

Other persons economically inactive includes those persons never in employment and not seeking work. Included are persons of independent means, housewives and others engaged in unpaid domestic duties and the permanently sick or disabled.

Economically Active

In employment means having a job during the week ended 4 April 1981. Temporary, part-time or casual employment is included. Persons absent from their employment due to holidays, strikes, lock-outs, short time working or temporary stoppages are regarded as in employment. Persons off work sick are regarded as in employment if their jobs are waiting for them on return.

Out of employment means seeking work or prevented by temporary sickness from seeking work or waiting to take up a job already accepted.

Part-time workers

Part-time workers were persons in a job in the week preceding Census day, in which the hours worked, excluding any overtime, were usually 30 hours or less per week.

Transport to Work and Time Journey Starts

Persons in employment were asked to state how the longest part (by distance) of their daily journey to work was made and the time that journey usually started.

Classification of occupations

The occupation of a person is the kind of work performed and this alone determines the assignment of the person to an occupation group. The nature of the factory, business or service in which the person is employed has no bearing on the classification of the occupation, except to the extent that such information may clarify the nature of the duties. For example, a crane driver may be employed in a shipyard, an engineering works or in building and construction, but this has no bearing upon his occupation and all crane drivers are classified to the same occupation group.

Occupation codes are allocated from the answers to question 13 on the census form. In the tables, occupations are classified according to the Classification of Occupations 1980 issued by the Office of Population Censuses and Surveys and published by HMSO under ISBN 0 11 6907282.

The main purpose of the classification is to identify groups with at least one common characteristic. The basic common factor of all groups is the type of work and the nature of the operation. If however, unit groups based solely on kind of work undertaken seemed too comprehensive in terms of the material worked in or the degree of skill involved or the physical energy required or the environmental conditions or the social and economic status associated with the occupation they were sub-divided on the basis of these factors to give substantially separate occupations.

In general, in order to merit separate identification each occupation unit should satisfy certain conditions, for example, that there is sufficient potential interest in the occupation; that the identification of the unit is likely to be tolerably complete and accurate from the limited information obtained from the census; and that the statistics from a proposed occupational unit could not be obtained by a cross classification of a more general occupation title by industry.

Certain principles of the classification

Certain groups of persons in employment, in particular the self-employed and the managers give rise to difficult conceptual problems.

Self-employed. In certain cases the self-employed are treated as managers because they have independent responsibility which involves the performance of managerial functions. This can apply even though they may not have supervisors under their control. Thus owners of wholesale and retail establishments, catering and lodging establishments and farms, for example, are classified under managerial occupations. Self-employed travel agents, employment agents and ticket agents are assigned to 037.2. However, owners of small undertakings who exercise a professional or craft function, and whose management role is clearly subordinate to the application of specialist skills are classified to those skills; for example self-employed accountants, bakers and electricians are classified as accountants, bakers and electricians, and not as managers. All professional and semi-professional workers are classified to that profession. There are instances where the proprietor may not carry out the functions e.g. a nursing home proprietor or even a proprietor of a dental practice. Because of the small number involved and the impossibility of determining whether they actually perform the professional duties, these persons are included in the professions. Self-employed forestry workers and minor agricultural workers e.g. bee keepers, maggot breeders, hedgers and ditchers and gardeners are classified as workers. Self-employed manufacturers are classified with the workers, thus a proprietor of a silk weaving business is classified as a weaver. The proprietor of more general functions e.g. textile manufacturer is assigned to the appropriate not elsewhere classified (n.e.c.) group. Owners of firms providing services, such as a typewriting bureau or photographic agency with regard to whom there is no evidence that they perform the actual work associated with such services are classified in group 057.6 unless specifically mentioned elsewhere. Self-employed builders and contractors will be assigned to group 140.6.

Managers. The growing recognition of management as an occupation in itself which is to a certain extent independent of the particular field in which it is exercised, has led to managers being included in specific groups. There are however, exceptions to this. In some fields, mainly services, the title of manager is given to persons with comparatively limited responsibilities and also because in some cases the main activity is that of an occupation other than management. Managers of professional activities whose work chiefly comprises maintaining the professional or technical quality of the work done are assigned to the relevant professional or technical group. Therefore such persons as chief accountants, Borough engineers, headmasters and editors are classified within the groups for accountants, civil engineers, teachers and writers respectively.

Supervisors/Foremen. Generally supervisors are classified in separate groups which can be related to the type of work supervised. Where a foreman controls a variety of workers or is identified only by branch of industry he is classified in the group relating to workers n.e.c. most appropriate to the branch of industry. Thus a clothing factory foreman is classified in 101.6 and a food factory foreman is classified in 090.6. Such foremen in the engineering industries are however allocated to -.1 Foremen (engineering and allied trades). Works, general and senior foremen in manufacturing and construction are considered managers and coded accordingly to groups 034.0 and 035.1 respectively.

Labourers. The groups 159.1–159.8, 160.1–160.8 assigned to labourers are strictly limited to persons

performing occupations requiring little or no training or experience and for this reason certain groups of persons who have some degree of skill but are returned as labourers, e.g. fitters' labourers, are excluded.

Allocation of these groups is on a strictly industrial basis, thus departing from the general basis of classification elsewhere; the industry concerned is that of the 'establishment'† taken as a whole. This split is purely for convenience and, with the exception that foundry labourers are separated into groups 159.5 and 160.5, the resulting information could also be obtained from a cross-classification by industry.

Apprentices, artied pupils and learners are classified to the group appropriate to those whose training is completed. Graduate and student apprentices are classified to the professional occupation for which they are training.

Armed Forces. For the various economic activity and social classifications it is intended to keep distinct all uniformed members of the Services and officers are in separate groups from the men. Medical officers and chaplains are accordingly assigned to the groups for Armed Forces officers, 041.0, 042.0.

Classification of industries

The industry in which a person is engaged is determined by the business or economic activity in which his or her occupation is followed. While the occupational classification takes account only of the nature of the work performed the industrial classification relates only to the nature of the service or product to which the labour contributes. For example, a carpenter would be classified industrially to building, if employed by a builder, but to brewing if employed by a brewery firm. The allocation of an employed person (a person who had a job at sometime in the week before Census Day) to an industry was based on the answer given to question 12 on the census form. Industries are classified in the tables according to the revised 'Standard Industrial Classification' [SIC] (HMSO 1980 ISBN 0 11 6307641) issued by the Central Statistical Office.

The following are selected extracts from the preface to that publication:

'Introduction

The United Kingdom economy is made up of a wide range of economic activities through which goods are produced or services rendered by firms and other organisations. For analytical purposes, economic activities of a similar nature may be grouped together into 'industries', for example into agriculture, motor vehicle manufacture, retail distribution, catering, national government service. A system used to group activities in this way is described as an industrial classification. 'Industry' in this context is not restricted to extractive or production activities but extends to the provision of goods and services of all kinds.

2 Such a classification usually starts with a small number of broad groups of activities which are then subdivided into progressively narrower groups so that the classification can be used with varying amounts of detail for different purposes. Thus a broad group 'Transport and communication' may be subdivided first into the different modes of transport (road, rail, water, air) and communication (postal services, telecommunications) and these in turn into smaller subdivisions such as road haulage, bus and coach services, etc.

The basis and structure of the classification

8 The classification is intended to apply to units about which important economic statistics are collected . . . A number of different factors have been taken into account in the classification. They include the nature of the process or of the work done, the principal raw material used, the type or intended use of goods produced or handled, and the type of service rendered. Different factors predominate in different parts of the classification and in many cases a broad group based on one common factor is subdivided by reference to another. The different headings of the classification (i.e. the short titles of the industries) are accordingly worded so as to indicate the factor or combination of factors on which they are based and this is followed in each case by a brief description of the activities included.

9 Unlike the 1968 SIC which had 27 Orders, each divided into a number of 'Minimum List Headings' denoted by 3-digit numbers, the present classification has a decimal structure. The full range of activities is first divided into ten broad Divisions (listed in paragraph 12 below) each denoted by a single digit from 0 to 9. The Divisions are in turn subdivided into Classes (each denoted by the addition of a second digit), the Classes into Groups (3 digits) and the Groups into Activity headings (4 digits). There are 10 Divisions, 60 Classes, 222 Groups and 334 Activity headings. The full number of possible subdivisions at each level is not necessarily used but is varied according to the diversity of activities included. For example, Division 0 Agriculture, forestry and fishing is divided into only three Classes, without further subdivisions, whereas Division 4 Other manufacturing industries has 8 Classes, 50 Groups and 91 Activity headings. The use of 0 as the final digit for a Class, Group or Activity heading normally indicates that it is the only subdivision at that level. Thus Group 140 is the only Group in Class 14 (Mineral oil processing) but is itself divided into two Activity headings, 1401 and 1402. Class 16, (Production and distribution of electricity, gas and other forms of energy) on the other hand has three Groups which are therefore numbered 161, 162 and 163 but since none of these is further subdivided the Activity headings are numbered 1610, 1620 and 1630. . . .

Statistical units

20 The classification is applied to units on the basis of their principal activity. Frequently no problem arises in defining the relevant unit. This will be the case, for example, where the unit is situated at a single address, is mainly engaged in a single activity (or group of activities falling within the same heading of the classification) and is operated as a separate entity for the purposes of record-keeping and accounting (including VAT returns).

21 In many cases, however, the situation is more complex. Many units produce, sell or provide a variety of goods or services, some of which are considered to be appropriate to one heading of the classification and some to another. In such cases the unit as a whole is classified according to the type of goods or services which make up the greater part of its production, sales or service. In governmental inquiries a unit's classification is made on the basis of information relating to the unit which is supplied on the particular return or which is already available from other inquiries. In some cases classification may be based on the units' own description of its principal activity.

22 The units to be classified may vary according to the type of data being collected and the purposes for which the data are required. In view of this it is important that when analyses by industry are prepared the statistical unit used for the inquiry concerned should be defined. Sometimes, in order to secure comparability between the results of different inquiries, it may be necessary to give some units more than one classification. This may occur, for example, when a unit at one address can provide a limited range of data, say, employment but for the provision of more comprehensive data has to be combined with another unit, or units, under the same ownership which are mainly engaged in a different activity.

24 Many businesses produce for their own use goods or services which are normally produced for sale by other industries. Typical examples are the manufacture or printing of containers for their own products, the generation of electricity, research, the repair and maintenance of buildings and equipment, and, occasionally, the construction or extension of buildings. If the relevant range of information is available these ancillary activities are treated as separate units and classified according to their own activity. But frequently the necessary data is not available, and the ancillary activities cannot be distinguished for most statistical purposes. Where ancillary activities are carried out at separate locations it may be possible to treat them as units for a limited range of data e.g. for the census of employment.

25 The sales staff of a manufacturing business are not treated as a separate establishment unless separate wholesale or retail outlets are operated and complete accounts are kept for them.

26 The classification of head offices or other central offices at separate locations from those at which the main activities of the business are carried out is determined by the nature of the activities of the units which they serve. If those units are all classified to the same industry there is no problem; but if they are classified to two or more different industries, the classification of the head office, etc. is that of the largest part of the activities. Exceptionally, if the activities are very diffuse, the central office is classified in heading 8396 – Central offices not allocable elsewhere – which is also used for the UK offices of businesses operating mainly abroad.

Some special points

30 *Steel* An exception to the rule of classification according to major activity is that reporting units whose activities include the basic manufacture of iron and steel, as defined in the ECSC Treaty, are classified to heading 2210 – Iron and steel industry.

31 *Merchanting activities* Establishments mainly engaged in merchanting, broking, importing and exporting are classified to the appropriate heading in the distributive trades, not to the industry or trade producing the goods in which they deal.

32 *Repair work* Much repair work is carried out either by the manufacturers or by the distributors of the goods concerned, or of similar goods, and in such cases it is rarely possible to distinguish a separate unit engaged mainly in repair work. There are, however, numerous units which specialise in repair work, mainly of consumer goods – motor vehicles, footwear, watches and clocks, television and radio sets, etc. These specialist repair activities are classified separately. The repair of capital equipment, such as ships, aircraft, and most types of plant and machinery is classified with the corresponding manufacture, even if carried out by specialist units. Units engaged in the repair and maintenance of buildings are classified to Construction.

33 *Construction* In principle all construction work should be classified to Class 50 – Construction. In practice it is impossible to obtain a full range of economic statistics for construction work done by all directly employed labour. These activities will generally be classified to the same heading as the establishment which they serve. The construction activities of direct labour forces employed by local authorities and government departments, using direct labour are, however, allocated to Class 50.

34 *Installation work* The installation of machinery, equipment, etc. is normally carried out by the manufacturer or distributor and is not distinguishable as a separate activity. There are some business units, however, where installation is the only, or the major activity. Such units are classified according to the type of equipment involved as follows:

- (i) The installation of items which can be regarded as forming an integral part of a building, e.g. an electrical wiring system, heating and ventilating apparatus, is classified to Construction.
- (ii) The installation of equipment which requires little more than the connection of the equipment to the mains, e.g. of domestic washing machines, television sets, is classified to Distribution.
- (iii) The installation of plant and machinery, e.g. a computer, is . . . classified with the manufacture of similar articles . . .

Industry codes were assigned, as far as possible, by reference to lists from the Department of Economic Development which gave names and addresses of employers by industry code. Where the employer's name at 'a' of the question was not listed, a code was allocated from the information given at 'a' and 'b' of the question.

Socio-economic groups

Classification by socio-economic groups was introduced in 1951 and extensively amended in 1961. The

classification aims to bring together people with jobs of similar social and economic status. The allocation of occupied persons to socio-economic groups is determined by considering their employment status and occupation (and industry, though for practical purposes no direct reference is made since it is possible in Great Britain to use classification by occupation as a means of distinguishing effectively those engaged in agriculture).

The socio-economic groups with brief definitions are:

- (1) **Employers and managers in central and local government, industry, commerce, etc.—large establishments**
 - 1.1 Employers in industry, commerce, etc.
Persons who employ others in non-agricultural enterprises employing 25 or more persons.
 - 1.2 Managers in central and local government, industry, commerce, etc.
Persons who generally plan and supervise in non-agricultural enterprises employing 25 or more persons.
- (2) **Employers and managers in industry, commerce, etc.—small establishments**
 - 2.1 Employers in industry, commerce, etc. – small establishments. As in 1.1 but in establishments employing fewer than 25 persons.
 - 2.2 Managers in industry, commerce, etc. – small establishments. As in 1.2 but in establishments employing fewer than 25 persons.
- (3) **Professional workers—self-employed**
Self-employed persons engaged in work normally requiring qualifications of university degree standard.
- (4) **Professional workers—employees**
Employees engaged in work normally requiring qualifications of university degree standard.
- (5) **Intermediate non-manual workers**
 - 5.1 Ancillary workers and artists
Employees engaged in non-manual occupations ancillary to the professions, not normally requiring qualifications of university degree standard; persons engaged in artistic work and not employing others therein. Self-employed nurses, medical auxiliaries, teachers, work study engineers and technicians are included.
 - 5.2 Foremen and supervisors non-manual
Employees (other than managers) engaged in occupations included in group 6, who formally and immediately supervise others engaged in such occupations.
- (6) **Junior non-manual workers**
Employees, not exercising general planning or supervisory powers, engaged in clerical, sales and non-manual communications occupations, excluding those who have additional and formal supervisory functions (these are included in group 5.2).
- (7) **Personal service workers**
Employees engaged in service occupations caring for food, drink, clothing and other personal needs.
- (8) **Foremen and supervisors—manual**
Employees (other than managers) who formally and immediately supervise others engaged in manual occupations, whether or not themselves engaged in such occupations.
- (9) **Skilled manual workers**
Employees engaged in manual occupations which require considerable and specific skills.
- (10) **Semi-skilled manual workers**
Employees engaged in manual occupations which require slight but specific skills.
- (11) **Unskilled manual workers**
Other employees engaged in manual occupations.
- (12) **Own account workers (other than professional)**
Self-employed persons engaged in any trade, personal service or manual occupation not normally requiring training of university degree standard and having no employees other than family workers.

- (13) **Farmers—employers and managers**
Persons who own, rent or manage farms, market gardens or forests, employing people other than family workers in the work of the enterprise.
- (14) **Farmers—own account**
Persons who own or rent farms, market gardens or forests and having no employees other than family workers.
- (15) **Agricultural workers**
Persons engaged in tending crops, animals, game or forests, or operating agricultural or forestry machinery.
- (16) **Members of armed forces**
- (17) **Inadequately described and not stated occupations**

Cars and Vans

The number of cars and vans normally available for use by the household including any car or van provided by employers but excluding vans used solely for the carriage of goods.

Presentation Conventions

A dash (–) indicates that the entry is zero. A blank indicates that a particular combination of line and column is impossible. In the presentation of rates, a rate shown as 0 indicates that the actual rate is less than one half of a unit but is not zero.

‘H’ Form

For reference purposes the ‘H’ form used for private households in the 1981 Census is produced at the end of this report.

TABLE 1 Resident Population by Area of Workplace

Local Government Districts

Area of workplace	Area of residence																	
	Northern Ireland		Antrim		Ards		Armagh		Ballymena		Ballymoney		Banbridge		Belfast		Carrickfergus	
	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females

1981 CENSUS—NORTHERN IRELAND

H Form for Private Households

A household comprises either one person living alone or a group of persons (who may or may not be related) living at the same address with common housekeeping. Persons staying temporarily with the household are included.

To the Head or Joint Heads or members of the Household.

Please complete this form and have it ready for collection by the Census enumerator who will call on **Monday 6 April 1981** or soon after that day. If you are not sure how to answer any of the questions, the enumerator will be glad to help you when he or she calls. He will also need to make sure that you have filled in all these entries and you should give him any information which he may need for this purpose.

Completion of this form is compulsory under the Census Act (Northern Ireland) 1969, and if you refuse to complete it or give false information you may have to pay a fine of up to £10. There is no penalty for refusing to state religious denomination as this is a voluntary question.

The legal obligation to fill in the form rests on **you** but each person who has to be included is required to give you the information which you need. However, if any member of the household who is aged 16 years or over does not wish to give you his personal information, please ask the enumerator for an individual form and envelope. The completed individual form can then be returned in the official envelope direct to the enumerator or to the local census officer and you need only answer questions 1, 5 and 6 on this form for that person. If the completed individual form is given to you in the envelope, you should pass it unopened to the enumerator.

The information which you give on the form will be treated as **STRICTLY CONFIDENTIAL** and will be used only for compiling statistics. No names and addresses will be fed into the computer and **no information about named individuals will be passed by the Census Office to any other Government Department or to any other Authority or person.** If anyone in the census organisation improperly discloses information which you provide, he will be liable to prosecution. Similarly, you must not disclose any information which anyone (for example, a visitor or boarder) gives you to enable you to complete the form.

When you have completed the form, please sign the declaration at the foot of the last page.

Planning code

Where boxes are provided please tick the appropriate box (Please use ink or ballpoint pen)					
1-2 Beginning with the head or joint head of the household include on this form: (a) each person alive at midnight on 5 April 1981 who spends the night of 5-6 April in this household. (b) each person who usually lives in this household but spends the night of 5-6 April elsewhere—include those in hospital, on holiday, at school or university even if they are being put on another census form elsewhere. (c) all visitors, anyone on night work or travelling overnight to arrive in your household on 6 April. (d) a new baby still in hospital—if not yet named enter 'BABY' in Forename column.		1st person	21	2nd person	22
		Surname		Surname	
		Forename(s)		Forename(s)	
		Sex <input type="checkbox"/> Male <input type="checkbox"/> Female		Sex <input type="checkbox"/> Male <input type="checkbox"/> Female	
3. Date of birth		Day Month Year		Day Month Year	
4. Marital Status Please tick the box showing the present marital status. If separated but not divorced please tick 'Married (1st marriage)' or 'Re-married' as appropriate.		1 <input type="checkbox"/> Single (never married) 2 <input type="checkbox"/> Married (1st marriage) 3 <input type="checkbox"/> Re-married 4 <input type="checkbox"/> Divorced 5 <input type="checkbox"/> Widowed		1 <input type="checkbox"/> Single (never married) 2 <input type="checkbox"/> Married (1st marriage) 3 <input type="checkbox"/> Re-married 4 <input type="checkbox"/> Divorced 5 <input type="checkbox"/> Widowed	
5. Relationship in Household Please tick the box which shows the relationship of each person to the person entered in the first column. Please write in relationship of 'other relative'—for example, father, daughter-in-law, brother-in-law, niece, uncle, cousin, grandchild. Please write in position in household of 'unrelated person'—for example, boarder, housekeeper, friend, flatmate, foster child etc.				Relationship to 1st person 1 <input type="checkbox"/> Husband or wife of first person 2 <input type="checkbox"/> Son or daughter of first person 3 <input type="checkbox"/> Other relative—please state: 4 <input type="checkbox"/> Unrelated, please state: 	
6. Whereabouts on night of 5-6 April 1981 Please tick the appropriate box to indicate where the person was on the night of 5-6 April 1981.		1 <input type="checkbox"/> At this address, out on night work or travelling to this address 2 <input type="checkbox"/> Elsewhere in N. Ireland 3 <input type="checkbox"/> Outside N. Ireland		1 <input type="checkbox"/> At this address, out on night work or travelling to this address 2 <input type="checkbox"/> Elsewhere in N. Ireland 3 <input type="checkbox"/> Outside N. Ireland	
7. Usual Address If the person usually lives here tick 'this address' box. If not then tick 'elsewhere' box and enter the person's usual address. Students and children away from home during term-time should regard their home address as their usual address. Boarders should decide if they consider this their usual address. The home address should be taken as the usual address for a head of household who lives away from home for part of the week.		<input type="checkbox"/> This address <input type="checkbox"/> Elsewhere—please state below <i>Block capitals please</i> Address		<input type="checkbox"/> This address <input type="checkbox"/> Elsewhere—please state below <i>Block capitals please</i> Address	
8. Usual Address one year ago If the person's usual address one year ago (i.e. on 5 April 1980) was the same as that given in answer to question 7 please tick 'same' if not, please tick 'different' and write in the usual address. If everyone on the form has moved from the same address, please write the address in full for the first person and indicate with an arrow that this applies to the other people on the form. For a child born since 5 April 1980 write 'UNDER ONE'.		<input type="checkbox"/> Same as Question 7 <input type="checkbox"/> Different—write the person's address on 5 April 1980 <i>Block capitals please</i> Address		<input type="checkbox"/> Same as Question 7 <input type="checkbox"/> Different—write the person's address on 5 April 1980 <i>Block capitals please</i> Address	
9. Country of birth If the person was born in Northern Ireland, Wales, Scotland, England or the Republic of Ireland please tick the appropriate box. If the person was born in another country tick box 6 'Elsewhere' and write the present name of that country.		1 <input type="checkbox"/> Northern Ireland 2 <input type="checkbox"/> Wales 3 <input type="checkbox"/> Scotland 4 <input type="checkbox"/> England 5 <input type="checkbox"/> Republic of Ireland 6 <input type="checkbox"/> Elsewhere Please write the present name of the country		1 <input type="checkbox"/> Northern Ireland 2 <input type="checkbox"/> Wales 3 <input type="checkbox"/> Scotland 4 <input type="checkbox"/> England 5 <input type="checkbox"/> Republic of Ireland 6 <input type="checkbox"/> Elsewhere Please write the present name of the country	
10. Religion Please state the Religion, Religious Denomination or Body to which the person belongs. The general term 'Protestant' should not be used alone and the denomination should be given as precisely as possible.		Religion		Religion

11. Whether working, retired, housewife, etc. last week
Please tick all boxes appropriate to the person's activity last week.
A job (box 1 and box 2) means any work for pay or profit but not unpaid work. It includes:
casual or temporary work
work on a person's own account
work in a family business
part-time work even if only for a few hours
A part-time job (box 2) is a job in which the hours worked, excluding any overtime are usually 30 hours or less per week.
Tick box 1 or box 2, as appropriate, if the person had a job but was not at work for all or part of the week because he or she was:
on holiday
temporarily laid off
on strike
sick
For a full-time student tick box 9 as well as any other appropriate boxes
Do not count as a full-time student, a person in a paid occupation in which training is also given, such as a student nurse, an apprentice or a management trainee.

Questions about present or previous employment

For persons in a job last week

For persons wholly retired

For persons out of work last week

For persons prevented from working because of permanent sickness or disablement

For other persons including those with no previous job

— please answer questions 12-16 in respect of the main job during the week.

— please answer questions 12-14 in respect of the most recent full-time job, if any.

— please write 'Not applicable' at question 12 and leave questions 13-16 blank.

12. Name and Business of Employer (if self-employed the name and nature of the person's business)
At (a) give the trading name if one is used and avoid abbreviations or initials. At (b) please describe clearly what the employer (or self-employed person) makes or does.
For members of the Armed Forces, civil servants and local government officers see note 1 on back page before answering this question.
For a person employed in private domestic service please write 'Domestic Service'.

a Name of Employer

a Name of Employer

b Nature of business

b Nature of business

13. Occupation
At (a) please give full and precise details of the person's occupation. Terms such as fitter or engineer should not be used by themselves. Greater detail is required, for example, tool-room fitter, electrical engineer etc. If unemployed or retired state the usual occupation when working.
At (b) describe the actual work done.
Civil Servants: At (a) civil servants should write 'Civil Servant' and at (b) non-industrial civil servants should state their rank or grade and industrial civil servants should give the job title only, for example, radio mechanic or wood working machinist.
Other Public Officials: Local Government and other public officials should give their rank or grade at (a) and complete (b).
Armed Forces: Members should give their rank or rating at (a) and leave (b) blank.
